

ENER-GX SALES OUT OF THE BOX

ENER-GX Sales Out of the Box is the lean alternative to a highly individualised software implementation. The Out of the Box concept guarantees a quick and straightforward product implementation.

Start working now - customise later

ENER-GX Sales Out of the Box relies on a standardised configuration and standardised interfaces. As a result, you can use the system in a live environment in no time. Identify your individual requirements during the first phase and let our specialists make the required adjustments in a small follow-up project.

Use your own hardware - or use ours

Run ENER-GX Sales Out of the Box in your company's or your hosting provider's data centre or use our Software as a Service solution and let us do the work.
